Allowable Subject Matter

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Prior art does not teach that, each switching device including a Micro-electromechanical system comprising a flexible membrane supported by at least two pillars that are placed between said membrane and the first face of the cell, said membrane thus being placed above the end of each strand facing the central disk and that peripheral part of said disk which is placed facing this end, said membrane, when the control voltage is applied, being deformed by the resulting electrostatic force sufficiently to ensure electrical connection between the end of the strand and the corresponding peripheral part of the central disk, said switching device being of the capacitor type and the electrical connection corresponds to a large increase in its capacitance in combination with all limitations recited in independent claim 1.

The remaining dependent claims 2-29 are allowable for at least above reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
